### About OSCP PEN 200 Course

The industry-leading Penetration Testing with Kali Linux (PWK/PEN-200) course introduces penetration testing methodologies, tools, and techniques in a hands-on, self-paced environment. Learners who complete the course and pass the exam will earn the OffSec Certified Professional (OSCP) certification which requires holders to successfully attack and penetrate various live machines in a safe lab environment. The OSCP is considered to be more technical than other ethical hacking certifications and is one of the few that requires evidence of practical penetration testing skills.
