- **Module 04:** Navigating Onion Services and Directories
- **Module 05:** Accessing and Analyzing Dark Web Marketplaces
- **Module 06:** Identifying Illegal Listings and Activities
- **Module 07:** Introduction to OSINT in Dark Web Investigations
- **Module 08:** Collecting Intel & Monitoring Threat Actors
- **Module 09:** Cryptocurrency Basics for Dark Web (Bitcoin, Monero)
- **Module 10:** Tracking Crypto Transactions (Wallets, Mixers, Explorers)
- **Module 11:** Tools for Dark Web Monitoring & Alerts
- **Module 12:** Final Case Lab: Simulated Dark Web Investigation

Appreciation from Defence Sector

About the Course

Dark Web Investigation Course

Dark web investigation involves monitoring and analyzing illicit activities conducted on hidden networks like Tor, I2P, and Freenet, where users operate anonymously. Unlike the surface web, the dark web is intentionally concealed and requires specialized tools to access, making it a hub for cybercrime, black markets, and illegal transactions. Law enforcement agencies, cybersecurity firms, and threat intelligence analysts conduct dark web investigations to track criminal operations, gather evidence, and prevent cyber threats such as data breaches, drug trafficking, and hacking services.
